E. Changes in Method of Diversion – Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES NO
Describe any water conservation efforts you have initiated: _____

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statement of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users if some one proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriations.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been served from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed. Water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

ITEM **CONTINUATION**

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.srcc.ca.gov/>".

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statement of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statement of Water Division and Use must be filed by riparian and prior to their divisions, and (3) assists the State to determine if additional water is available for future appropriations. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone with specific exceptions. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license only when there is a surplus not needed by riparian water users. Generally, appropriative water rights may be exercised from the State.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian land and for storage of water. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed as the riparian right to the sevared parcel. Generally, a riparian user must share the water supply with other riparian users. Separation of the riparian right to the natural lake or stream to take the sources of supply by intervening parcel without the same watershed as the water source and must never have been served from the natural lake or stream to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

I declare that the information in this report is true to the best of my knowledge and belief.
 I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I have data to support the above surface water use reductions due to conjunctive use efforts. YES NO
 yr (aff/mg) yr (aff/mg) yr (aff/mg)

b. If credit toward use under a claimed pre 1914 appropriate right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:

a. Are you now using groundwater in lieu of surface water? YES NO
 Conjunctive use of surface water and groundwater

I have data to support the above surface water use reductions due to wastewater reclamation. YES NO
 yr (aff/mg) yr (aff/mg) yr (aff/mg)

b. If credit toward use under a claimed pre 1914 appropriate water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:

a. Are you now using reclaimed water for other beneficial uses? YES NO
 a degree which unreasonably affects such water for other beneficial uses?

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriations.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Information Pertaining to Water Rights in California"
- "Statement of Water Diversions and Use"
- "Appropriation of Water in California"

STATE OF CALIFORNIA
THE RESOURCES AGENCY
STATE WATER RIGHTS BOARD

STATEMENT OF WATER DIVERSION AND USE

S. 933

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water..... Pacific Gas and Electric Company
Address..... 245 Market Street, San Francisco, California 94106

B. Name of body of water at point of diversion..... Lake Almanor
Tributary to..... North Fork Feather River

C. Place of diversion SW ¼ NE ¼ Section 11, Township 27N, Range 7E, MD Box,
Plumas County, or locate it on sketch of section grid on reverse side with regard to section lines or
prominent local landmarks.

D. Name of works..... Butt Valley Tunnel

E. Capacity of diversion works..... 2000 cubic feet per second
Capacity of storage reservoir..... gallons
State quantity of water used each month in gallons or acre-feet (thousands)

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1966	52.9	23.9	7.7	0	0	48.0	99.2	85.6	7.5	24.1	11.8	41.8	402.5

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as
acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in recent years..... gallons

Minimum annual water use in recent years..... acre-feet

Type of diversion facility: gravity , pump

Method of measurement: weir , flume , electric power meter , water meter , estimate

F. Purpose of use (what water is being used for)..... Generative electric energy

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
Butt Valley hydro electric plant - SW ¼ of NW ¼ Section 27

H. Year of first use as nearly as known..... 1913

I. Name of person filing statement..... Hugh R. Daniels
Manager
Position Hydro Generation Dept. Organization Pacific Gas and Electric Company
Address 245 Market Street, San Francisco, California 94106

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed..... JUN 5 1967

Signature *Hugh R. Daniels*
